

## Nor'west Arc Cycleway – Section Three

Construction of the Nor'west Arc cycleway between Princess Margaret Hospital and the University of Canterbury is nearing completion. This final section will connect the University to Jellie Park and Harwood Road. This section has received \$10.5million in Government funding. However, if the Option A scenarios below are both selected, they are likely to require an additional \$1million of Council funding.

We're seeking public feedback on the cycleway including the following options:

### Option A Ilam Road – one-way cycleway

This option includes one-way cycleways on each side of the road and is considered safer and more intuitive for all users as cyclists are travelling in the same direction as drivers.

### Option B Ilam Road – two-way cycleway

This option includes a two way cycleway on the western side of Ilam Road and allows for more on-street parking. However, people turning across the cycleway will need to look for cyclists coming from either direction.

### Option A Aorangi Road (Ilam Road to Brookside Terrace) – two-way cycleway

This option includes a two-way cycleway on the west side of Aorangi Road and separates people biking from people walking but removes most on-street parking on Aorangi Road.

### Option B Aorangi Road (Ilam Road to Brookside Terrace) – two-way shared path

This option includes a shared path for cyclists and pedestrians on the west side of Aorangi Road. This keeps on-road parking on Aorangi Road but we'll need to remove the silver birch trees along this stretch of road and people walking and biking would share this space.

## Kōrero mai | Have your say

9

Condell Avenue,  
Matsons Avenue to  
Harewood Road

## Te Ara O-Rakipaoa Nor'west Arc Cycleway

University–Jellie Park–Papanui

We want to hear your feedback on the options.  
Help us make it way safer for everyone.

Consultation closes  
Tuesday 12 October 2021

## Drop in sessions\*

Come and talk to the team about the proposed cycleway  
**New Generation Church, 309 Clyde Road (corner Aorangi Road)**  
 Monday 20 September, 4.30pm – 6pm  
**Cobham Intermediate School, 294 Ilam Road**  
 Thursday 23 September, 3pm – 5.30pm

\*These sessions may need to be postponed or cancelled if COVID alert levels change. Under current guidelines, 50 people will be allowed inside the venue at one time and attendees will need to stay 2 metres apart. Please scan/sign-in and wear a mask.

### Can't make these meetings?

If there is a community meeting you would like us to attend, please let us know. You can also phone any time to speak with us directly about the project.

Senior Engagement Advisor, Tessa Zant

If you don't have access to a computer, you can get a copy of the plans from Papanui, Riccarton and Fendalton Service Centres, Jellie Park Sports and Recreation Centre and Civic Offices.

[ccc.govt.nz/haveyoursay](http://ccc.govt.nz/haveyoursay)

## Parking options

We know parking is important to residents and businesses, so we've tried to remove as little on-street parking as possible. However both proposed options have some level of parking loss, as the roads aren't wide enough to accommodate the cycleway without this.

One-way cycleways (Option A) are considered safer and more intuitive for all users. However, a two-way cycleway on Ilam Road (Option B) will keep more parking. On Aorangi Road, the shared path design (Option B) keeps more parking but removes some trees, which will be replaced further north on Aorangi Road.

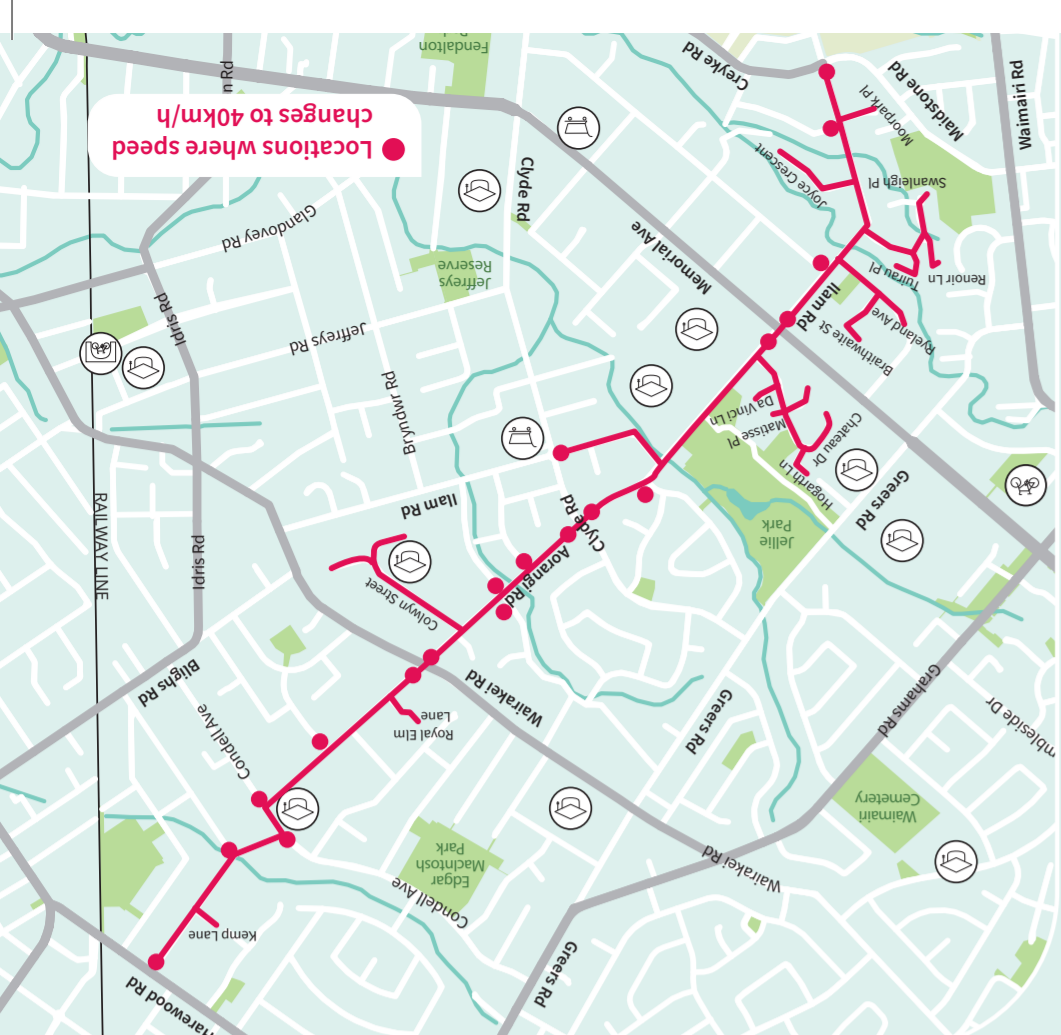

**Ilam Road**

- Option A (one-way cycleway) - 143 car parks removed (54%)
- Option B (two-way cycleway) - 123 car parks removed (46%)

**Aorangi Road**

- Option A (two-way cycleway) - 199 car parks removed (46%)
- Option B (shared path) - 129 car parks removed (30%)

Detailed plans, including parking options, are available online [ccc.govt.nz/haveyoursay](http://ccc.govt.nz/haveyoursay).

## Slower speeds

A 40km/h speed limit along the entire route will improve safety for all road users. Narrowing the existing road to make room for the cycleway will encourage lower driving speeds.

## Safer street lighting

Street lighting will be upgraded where required along the route to make the cycleway safer and easier to use after dark. This will include installing new street lights. Check the plans for the proposed locations of the new street lights.

## How to give us your feedback

You can provide your feedback until **12 October 2021** in a number of ways. Let us know your preferred options and please remember to include your full name and address (see note below).

- Fill out our online form at [ccc.govt.nz/haveyoursay](http://ccc.govt.nz/haveyoursay)
- Email: [cycleways@ccc.govt.nz](mailto:cycleways@ccc.govt.nz) with 'Nor'west Arc' in the subject line.
- Mail for free to:  
Freepost 178  
Attention: Tessa Zant  
Public Information & Participation Unit  
Christchurch City Council  
PO Box 73016, Christchurch 8154
- Deliver to: Te Hononga Civic Offices, 53 Hereford Street, or at drop-in sessions.

Please note:  
 We require your contact details as part of your feedback – it also means we can keep you updated throughout the project. Your feedback, name and address are given to decision-makers (Council) to help them make their decision. Feedback, with names only, go online when the decision meeting agenda is available on our website.  
 If requested, feedback, names and contact details are made available to the public, as required by the Local Government Official Information and Meetings Act 1987.  
 If there are good reasons why your details and/or feedback should be kept confidential, please contact our Engagement Manager on (03) 941 8999 or 0800 800 169 (Banks Peninsula).

Proposed Wairakei Road intersection layout

## Why we're building a cycleway

We're making it safer to bike, walk and drive with our new cycleway. Separating bikes from cars means there's more space for drivers and cyclists, making it safer for everyone on the road.

Cycleways are a key part of our plan to reduce carbon emissions. They also reduce congestion, improve the health of a city, reduce the long-term costs of infrastructure and build stronger local economies.

Te Ara O-Rakipaoa – Nor'west Arc Cycleway is one of 13 Major Cycleways linking schools, businesses, shopping centres, parks and popular recreation destinations all across Christchurch.

The Major Cycleways are different to other cycle lanes around the city. They are designed to encourage people to ride because they can see it's a safe, convenient option to get where they want to go.

The cycleways we have built so far have been well used and helped increase cycling city-wide. A morning count of people biking into the central city showed that 20 per cent more people were biking in March 2020 than a year earlier. This follows a pattern of yearly increases since we began building the cycleways in 2016.

## Way safer for everyone

Proposed road layouts along the route will change to improve safety for everyone.

Signalised crossings on Ilam Road between Jellie Park and Burnside / Cobham Schools and across Wairakei Road at the Aorangi intersection will provide safe crossings for both cyclists and pedestrians.

We're proposing to stop through-traffic and right turns for cars on Aorangi Road, at the Wairakei Road intersection. This busy intersection has safety issues and turning traffic causes congestion at peak times. We considered a fully signalised intersection. However, this option is less pedestrian friendly, reduces the amenity for the shops and may increase traffic using Aorangi Road as a cut through, which does not contribute to creating a safe cycling environment.

# Condell Avenue, Matsons Avenue to Harewood Road

This is map 9 of 9. You can view the whole route, including the planned cycleway on Harewood Road, online [ccc.govt.nz/haveyoursay](http://ccc.govt.nz/haveyoursay), or pick up any of the other maps from Papanui, Riccarton and Fendalton Service Centres, Jellie Park Sports and Recreation Centre and Civic Offices

Go online to tell us what you think or use the contact details on reverse

- There is a two-way cycleway protected by a raised separator planted with trees, along the north-west side of Aorangi Road, onto the west side of Condell Avenue.
- The raised and narrowed intersection of Condell Avenue and Aorangi Road slows vehicles and improves safety. There are pedestrian crossing points on Aorangi Road and on Condell Avenue south of the intersection. The two-way cycleway continues on the west side of Condell Avenue and parking on this side of the road is removed.
- The raised and narrowed intersection of Matsons Road and Condell Avenue slows vehicles and improves safety. There are pedestrian crossing points on Condell Avenue south of the intersection and Matsons Road.
- The cycleway crosses Condell Avenue and continues on the south-east side of Matsons Avenue. The road is wide enough for parking on both sides and the cycleway, protected by a raised separator planted with trees. All existing trees on Matsons Avenue are removed. However, these are generally not in good condition and some are close to power lines.
- The intersection of Windermere Road is narrowed to slow vehicles and improves safety. The road is wide enough for parking on both sides and the cycleway, protected by a raised separator planted with trees. All existing trees on Matsons Avenue are removed. However, these are generally not in good condition and some are close to power lines.
- The intersection of Windermere Road is narrowed to slow vehicles and improves safety. The current speed humps outside 164 and 138 Matsons Road are removed and replaced with a narrowed pedestrian crossing point outside number 179 Matsons Road.
- A 40km/h speed limit on Condell Avenue and Matsons Road improves safety for everyone.

Here the Nor'west Arc Cycleway connects to the Northern Line Cycleway via Harewood Road. The proposed section of cycleway on Harewood Road received feedback as part of the 'Wheels to Wings Cycleway' consultation earlier this year. You can still make comments on this section and all feedback will be considered together.

Map part 2

See map 8

We know from talking with the community that they worked hard to get the pedestrian island on Aorangi Road put in at the intersection with Condell Avenue. Currently, each lane of the road is about 6 metres wide. The new crossing point will be a similar distance across both lanes and the speed of vehicles will be reduced, making it just as safe and easy for pedestrians to cross Aorangi Road as it is now.

Proposed two-way cycleway on Matsons Avenue
