Medway Street Update - Temporary Road Reinstatement

Temporary road reinstatement

- The bypass installation in North Parade is due for completion on **Friday 7 July** (depending on weather and onsite conditions not causing delays).
- When the bypass is finished and North Parade has reopened, Downer will reshape the road surface, fill any potholes and lay chip seal on Medway Street. This road work will take up to 1-2 weeks to complete.
- Speed restrictions will be in place on Medway Street during this work and while the chip seal gravel settles. Please drive with care during this time.

Medway Street road renewal (Starting late September 2017)

- On 9 June, a work notice was delivered to Medway Street residents which showed the concept plans (pictured) for the Medway Street road renewal.
- The road renewal includes replacing the road surfaces, footpaths, kerb and channel and introducing street landscaping including planting trees and grass areas.
- **The permanent road renewal project is programmed to start in late September 2017 - Christmas 2017.** Start and finish dates will be provided closer to the work beginning.
- We've had a few queries about why we would temporarily chip-seal Medway Street, and then go back to install new kerbing and re-seal it soon afterwards. This is because construction traffic will still using Medway Street after the culvert installation has finished, and any permanent seal could be damaged.
- You can view the design plans on the Council website: www.ccc.govt.nz/environment/water/water-flooding/dudleycreekremediation/
- Further information will be distributed to residents about the permanent road reinstatement soon. Keep checking your letterbox for updates.

If you have any questions or concerns about this work, please contact Downer on **0800 033 747** or email dudleyinfo@downer.co.nz
