8. National Environment Standard (NES)

This section relates to the [National Environmental Standard for Assessing and Managing Contaminants in Soil to Protect Human Health](#) (NES).

The NES includes regulations controlling **soil disturbance, change of use, subdivision and removal/replacement of fuel storage systems** on properties which have been used either now or in the past for a hazardous activity or industry (known as HAIL) that may have resulted in contamination of the soil.

Please answer the following questions to determine whether the NES applies to your proposal.

Is the application site listed on Environment Canterbury’s Listed Land Use Register (LLUR)? www.llur.ecan.govt.nz . If YES, please include a copy of the LLUR statement with your application.	<input type="checkbox"/> Yes	<input type="checkbox"/> No
If the site is not listed on the LLUR, is an activity described on the Hazardous Substances and Industries List (HAIL) currently being undertaken on the piece of land to which this application relates, or is it more likely than not to have ever been undertaken on the land? The HAIL list is available at: https://environment.govt.nz/publications/hazardous-activities-and-industries-list-hail/	<input type="checkbox"/> Yes	<input type="checkbox"/> No

Type of HAIL activity:

If the answer to either of the above questions is YES, then the NES may apply, depending on the proposed activity. Please identify whether the application involves any of the activities below.

(If the answer to both of the above questions is NO, you do not need to answer the remaining questions in this section).

Will the proposed activity involve disturbance of more than 25m³ of soil (per 500m² of disturbed area)?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Volume of soil disturbance: <input type="text"/>		
Will the proposed activity involve removal of more than 5m³ of soil (per 500m² of disturbed area) from the site?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Volume of soil removal: <input type="text"/>		
Does the application involve changing the use of the land to one which, because the land has been subject to a HAIL activity, is reasonably likely to harm human health? (e.g. service station to office, orchard to residential)	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Does the application involve removing or replacing a fuel storage system or parts of it?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Does the application involve subdivision of the land?	<input type="checkbox"/> Yes	<input type="checkbox"/> No

If the answer to any of the above activity questions is also YES, then the NES will apply.

- Soil disturbance or removal exceeding the specified volumes requires resource consent.
- Changing the land use or subdividing the land will require resource consent if the permitted activity requirements of the NES are not complied with. These include provision of a Preliminary Site Investigation carried out by a suitably qualified and experienced practitioner.
- Removal or replacement of a fuel storage system will require consent if the permitted activity requirements of the NES are not complied with.

Does the proposed activity require resource consent under the NES?

Yes

No

If the answer is YES, an assessment of the application under the NES must be provided as part of your Assessment of Effects on the Environment (refer Section 10 above). A Detailed Site Investigation may be required.
