

## EXPLANATION

Following is a description of key proposed or possible developments, land use changes, and specific programmes and plans on or affecting areas adjacent to, and/or within, Hagley Park and the Botanic Gardens that will have an effect on the Park and/or the Gardens. They are not listed in any order of priority. For convenience, these are termed “projects”. These projects, some of which are led by Council Units other than the City

Environment Group, but in consultation with this Unit, will be managed to ensure that the optimum benefit accrues to the Park and the Gardens.

The status of these projects range from conceptual to proposed to approved/about to be implemented. Some are only at the stage where the elected Council has supported further detailed investigation being undertaken on them before a decision is made on whether or not to proceed with implementation. Public comment has been received on these projects through the public consultation held on the draft master plan in 2006. The submissions that were made were considered by the Hagley Park/Botanic Gardens Hearings Subcommittee prior to its recommendations to Council for adoption of the master plan as the operative plan.

See the section in this plan on the 2006 public consultation (Page 112) for information on the submissions analysis.

A number of projects that had been included in the draft master plan have been removed due to their being completed, progressed or Council resolving to decline to adopt them as part of the operative plan.

The next step in the process is for the proposed projects being investigated to be raised for consideration for inclusion in the Council’s Long-Term Council Community Plan 2009-29.

All developments implemented in the future shall comply with all policy, rules and legislation pertaining to Hagley Park and the Botanic Gardens.

There is no certainty, though, that the projects listed will be implemented, and the information presented here, although relevant at the date of this plan, is subject to change. The ultimate outcome for each will depend on a future decision by the elected Council.

The projects are separated according to which part of the Park/Gardens they affect.

## PROJECT LIST

(\* These are mapped on Page 24)

### Projects Affecting Both Hagley Park And The Botanic Gardens

- 1 Art Works in Hagley Park and the Gardens
- 2 Environmental 'best practice' audit/implementation
- 3 Events and exhibitions strategy
- 4 Finance and income strategy
- 5 Heritage conservation plan
- 6 Landscape and circulation
- 7 Marketing strategy
- 8 Monitoring and feedback on public use and satisfaction
- 9 Sustainable and healthy tree plan
- 10 Water conservation
- 11 Wildlife and habitat conservation plan
- 12 \*Building removal

### Projects Around Hagley Park And The Botanic Gardens

- 13 \*Riccarton Avenue enhancement
- 14 Landscape conservation zone
- 15 \*Park Terrace Landscape Plan
- 16 \*Road adjustments
- 17 \*Rolleston Avenue enhancement

### Projects Affecting North Hagley Park

- 18 \*Armagh Street entrance improvements
