

Christchurch City Council Shirley-Papanui Community Board Electing 5 Board Members

James PARK

My principal place of residence is in the Shirley-Papanui Community Board area.

I am employed by Opus International Consultants Ltd as a Road Network Operations and Management Engineer and work in a team contracted by NZ Transport Agency to manage State highways within Christchurch City.

I have lived in Casebrook for over 11 years and have two teenage children.

By running for the Community Board I want to; support the local community as we face the challenge of post-earthquake recovery, advocate on behalf of those who cannot, and use my 20 years experience of public infrastructure management to assist the community.

Our Ward's future prospects depend on our ability to engage with planning and actively participate in decision making as development and growth changes occur and acknowledging what impact these will have on our life.

I believe our community needs to determine its own future. We live here and what we decide now will influence its development and future direction.
