1. Introduction

1.1 Overview

Each year Christchurch City Council surveys the residents of Christchurch about customer satisfaction and resident's perceptions of city issues. The Annual Survey of Residents was conducted by Statistics New Zealand from 1991 to 1997, and by the National Research Bureau Ltd from 1998 to 2004. Since 2005 Opinions Market Research Ltd has been the provider of the Annual Survey of Residents.

In 2005 the Annual Survey of Residents methodology was altered from a face to face approach to a telephone methodology.

As a result of changes to the Council's information needs and changes in the legislated environment, in 2007 the Council moved to a biannual resident's survey format with surveys run in March and September each year. At the same time the question content was revised. The move to a Biannual format addresses the need for more frequent surveying to better enable the Council to track and respond to emerging issues in the community. It also allows for better coordination of the measurement of resident perceptions of the Council's performance, as well as the tracking of the city's progress toward achieving its community outcomes.

1.2 Survey Objective

The objective of the survey is:

To provide statistically reliable measures of the views of Christchurch residents on a range of services and facilities provided by Christchurch City Council.

The survey has been designed to produce statistical indicators, which provide measures of performance as set down in the Council's performance indicators for specified service delivery areas.

The statistical indicators combined with additional factors aid Council decision making and policy formulation, and help to determine priorities for resource allocation.

1.3 Scope and Coverage

The 2008 survey was conducted biannually, in March and September, among a representative sample of 770 Christchurch residents aged 15 years and over, in households with access to a telephone.

Given changes to the methodology and question structures, comparisons cannot be made with surveys conducted prior to 2005.

1.4 Methodology

The methodology for the September 2008 Annual Survey of Residents is described in detail in the companion report, *Biannual Survey of Residents 2008 Part I: Methodology and Questionnaire* (prepared for the Christchurch City Council by Opinions Market Research Ltd, Christchurch, September 2008). The same methodology and questionnaire format was employed for the March and September 2007 and 2008 surveys.

1.5 Reporting Format

The data has been provided in table format, as specified in the tender document, and comparisons have been made between 2007 and 2008. The data has been provided in total for each year (2007 and 2008) and individually for March and September.

Where applicable, comparisons have also been made with the 2005 and 2006 surveys. However, since the questionnaire in March 2007 was completely revised from the 2005 and 2006 questionnaire, results can be compared in only a few cases.

Findings from each of the March and September 2007 and 2008 surveys (with a sample of 770 each) have a margin of error of ±3% (at a 90% confidence level). Please note, any subset of the total sample will have a higher margin of error.

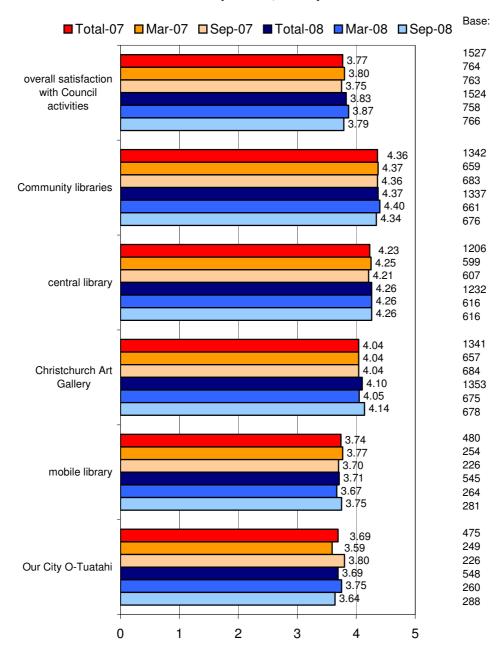

Findings from the total sample (n = 1540 per year) for 2007 and 2008, consisting of the combined dataset from the March and September surveys for each year, have a margin of error of approximately $\pm 2\%$ (at a 90% confidence level).

1.6 Overview of Satisfaction with Council Services

The following graph summarises satisfaction with cultural and learning services. Overall satisfaction with Council activities has been included as a point of reference. Mean scores are shown for each service. The scale used to calculate mean scores is 5 = very satisfied, 4 = satisfied, 3 = neither/ nor, 2 = dissatisfied, 1 = very dissatisfied.

Overview of Satisfaction with Cultural Services

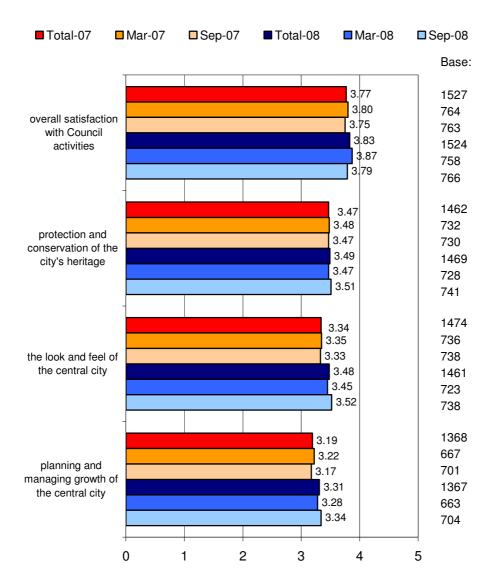

Mean Score: 5 = very satisfied, 1 = very dissatisfied

The following graph summarises satisfaction with city development. Overall satisfaction with Council activities has been included as a point of reference.

Overview of Satisfaction with City Development

The following graph summarises satisfaction with recreation and leisure services. Overall satisfaction with Council activities has been included as a point of reference.

Overview of Satisfaction with Recreation Services

Mean Score: 5 = very satisfied, 1 = very dissatisfied

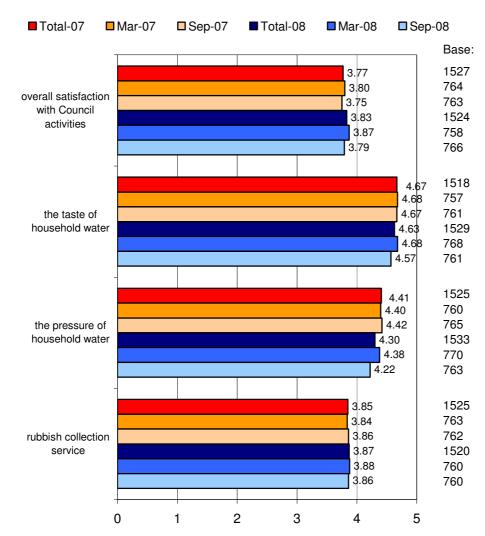

Please note: Satisfaction with services provided at Council Stadiums, Council leisure centres and Council swimming pools was asked of the total sample in 2008 whereas in 2007 it was asked only of users of the facility. The 2008 ratings therefore measure general perception of the facilities as opposed to satisfaction ratings based on experience.

The following graph summarises satisfaction with water and waste services. Overall satisfaction with Council activities has been included as a point of reference.

2. Recreation and Leisure

2.1 Use of Council Leisure Facilities

Respondents were asked which of the following Council facilities they had used in the last 12 months. Note: these findings are based on the total sample.

Base: Total Sample	Total 2007 1540 %	March 2007 770 %	Sept 2007 770 %	Total 2008 1540 %	March 2008 770 %	Sept 2008 770 %

2.2 Satisfaction with Council Leisure Facilities

Respondents were asked to think about all aspects of services provided at the above facilities and state how satisfied or dissatisfied they were with them. Note: these findings are based on users of the facility.

^{**} Note: Additional analysis after the September 2007 survey found users of the facility more positive in their rating of satisfaction. To ensure all facilities were measured consistently, this question was asked of all participants in March and September 2008. This accounts for the higher proportion of 'don't know' responses.

2.3 Awareness of Council Support

Respondents were asked whether they were aware that the Council:

- provided a range of community recreation programmes, including programmes like 'Learn to Swim', school holiday programmes and local festivals.
- supported a range of events and festivals such as Classical Sparks, World Buskers Festival, Christmas in the Park and local community festivals.
- provided support for sports activities, including grants and marketing support for sports organisations, bidding and funding to host international and national sports events, training for volunteers and support for participation programmes.

Note: these findings are based on the total sample.

4. City Development

4.1 Satisfaction with the Protection and Conservation of the City's Heritage

Respondents were read out the following statement 'The Council seeks to protect and conserve the city's heritage, by protecting old buildings or sites from damage or loss.' Respondents were then asked to rate how satisfied or dissatisfied they were that the Council adequately recognised and supported the protection and conservation of the City's heritage. Note: these findings are based on the total sample.

Results have been compared with 2006.

4.2 Satisfaction with Council Activities with regard to the Central City

Respondents were read the following statement: 'In the last 12 months, the Council has been undertaking a number of initiatives to revitalise the central city, which are intended to provide encouragement for people to return to the central city to live and to enjoy and spend time in the heart of the city. These include things like the refurbishment of the City Mall and the development of central city lanes such as Litchfield Lane and Poplar Lane.' Respondents were then asked to rate how satisfied or dissatisfied they were with the Council's activities in relation to the central city. Note: these findings are based on the total sample.

⁺ The wording of the question was slightly different in 2005 and 2006: 'water quality and taste' and 'water pressure and flow' were measured.

7.2 Water Use

The Council has been actively encouraging residents to use less water, especially during summer. Respondents were asked whether they were aware of this. Note: these findings are based on the total sample.
