

An Accessible City

Manchester Street update

Oct 2017 update

Full work restarts on 5 October

Background

Most of the work between Hereford Street and Lichfield Street is finished. Remaining work includes the area from Kilmore Street to Hereford Streets.

Downer is delivering this project for Ōtākaro Limited in partnership with Christchurch City Council, Environment Canterbury, Te Rūnanga o Ngāi Tahu and New Zealand Transport Agency.

An artist's impression of Manchester Street.

The target finish date is June 2018.

Parts of Manchester Street will be one-way for the majority of the work.

What will it look like?

When finished, Manchester Street will be a widened, tree-lined boulevard prioritised for buses. It will have a spacious shared path for cyclists and pedestrians on its eastern side, next to the East Frame.

Trees, landscaping and rain gardens will enhance the streetscape and complement the slower speed environment of the core of the central city.
